North Carolina’s December County and Area Employment Figures Released

RALEIGH — Unemployment rates (not seasonally adjusted) decreased in 91 of North Carolina’s counties in December, increased in four, and remained unchanged in five. Scotland County had the highest unemployment rate at 6.9 percent while Orange County had the lowest at 2.2 percent. All fifteen of the state’s metro areas experienced rate decreases. Among the metro areas, Rocky Mount had the highest rate at 5.0 percent while Durham-Chapel Hill had the lowest at 2.5 percent. The December not seasonally adjusted statewide rate was 3.2 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
December	90	10	0
November (Revised)	92	8	0

When compared to the same month last year, not seasonally adjusted unemployment rates decreased in all 100 counties. All 15 of the state’s metro areas experienced rate decreases over the year.

The number of workers employed statewide (not seasonally adjusted) increased in December by 13,301 to 4,909,662, while those unemployed decreased by 9,893 to 160,692. Since December 2020, the number of workers employed statewide increased 199,479, while those unemployed decreased 146,441.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Monday, March 14, 2022 when the state unemployment rate for January 2022 will be released.

These data can be accessed on the Commerce website at <https://d4.nccommerce.com/>

Accessing Data

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

Technical Notes

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

Labor force and unemployment--from the LAUS program

Definitions. The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2021, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at <https://www.bls.gov/opub/hom/lau/calculation.htm>.

Revisions. Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

Area definitions. The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at www.bls.gov/lau/lastderr.htm.

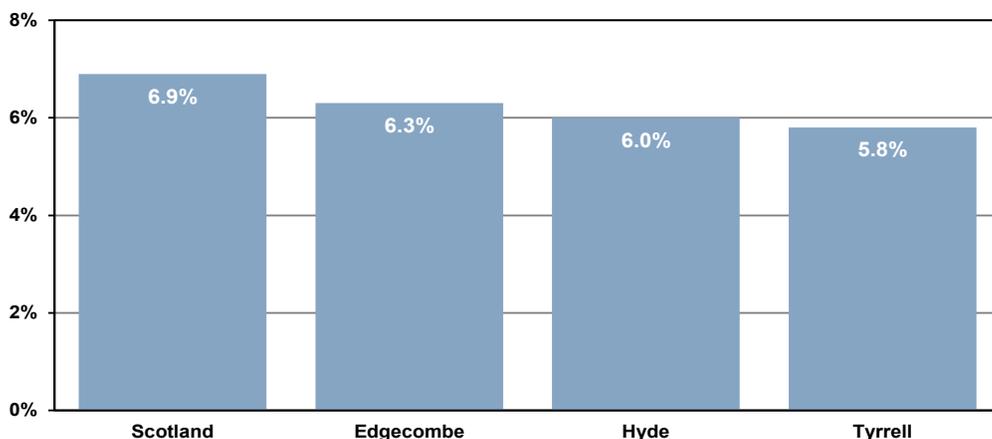

Release Dates

The next unemployment update is scheduled for Monday, March 14, 2022 when the state unemployment rate for January 2022 will be released.

The complete 2022 data release schedule can be accessed at:

<https://www.nccommerce.com/documents/release-dates-unemployment-rates>

Counties With Highest Unemployment Rates December 2021* (Not Seasonally Adjusted)

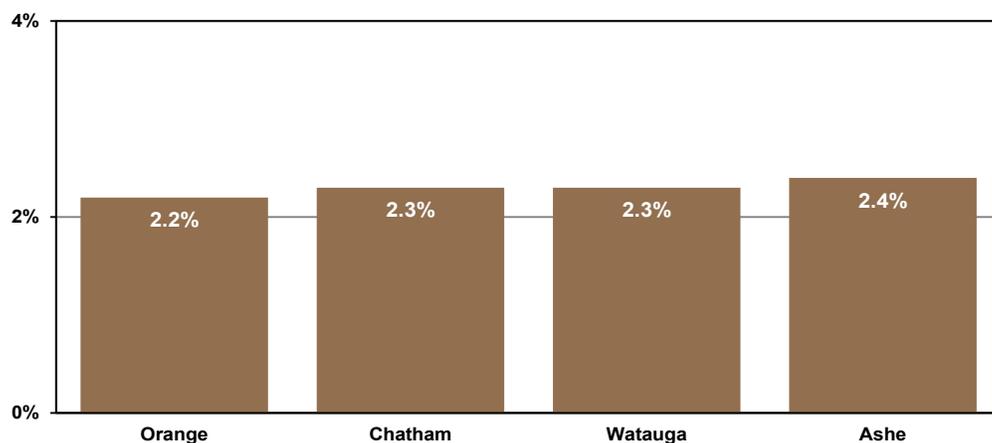

North Carolina's statewide unemployment rate (not seasonally adjusted) was 3.2 percent in December. This decreased 0.2 of a percentage point from November's revised rate, and declined 2.9 percentage points over the year.

Over the month, the unemployment rate decreased in 91 of North Carolina's 100 counties. Fifty-eight counties had unemployment rates at or below the state's 3.2 percent rate.

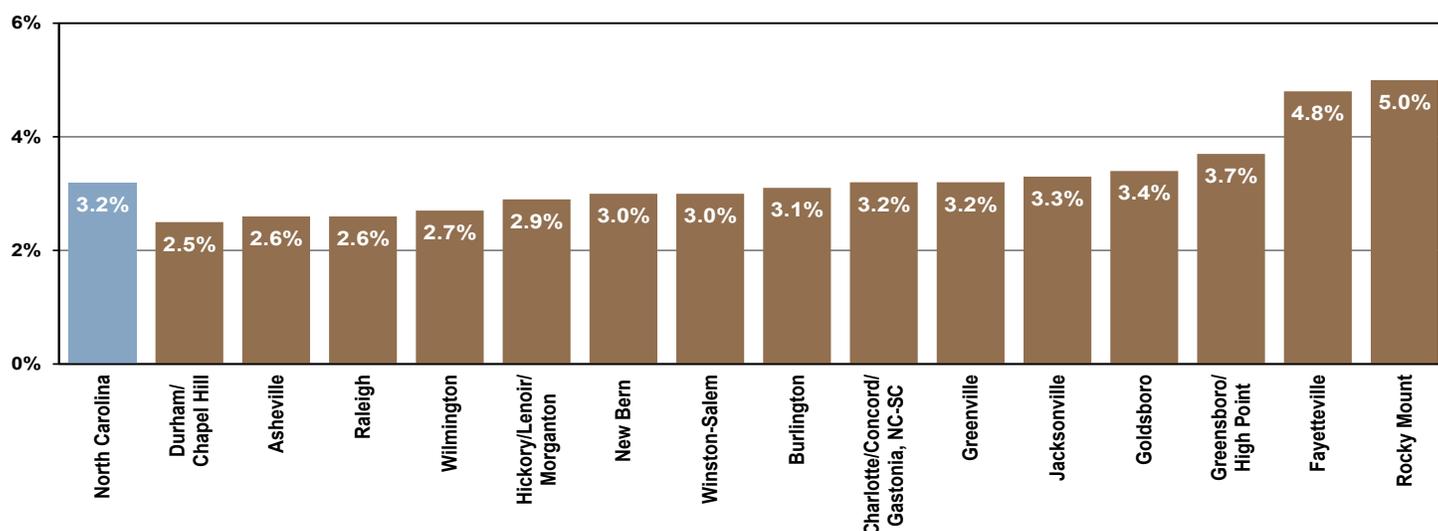

Scotland County recorded December's highest unemployment rate at 6.9 percent, followed by Edgecombe at 6.3 percent. Orange County had the lowest unemployment rate at 2.2 percent, followed by Chatham and Watauga Counties each at 2.3 percent.

Counties With Lowest Unemployment Rates December 2021* (Not Seasonally Adjusted)

Unemployment rates decreased in all of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Rocky Mount MSA had the highest unemployment rate in December at 5.0 percent. The Durham/Chapel Hill MSA reported the month's lowest unemployment rate at 2.5 percent, followed by Asheville and Raleigh at 2.6 percent each.

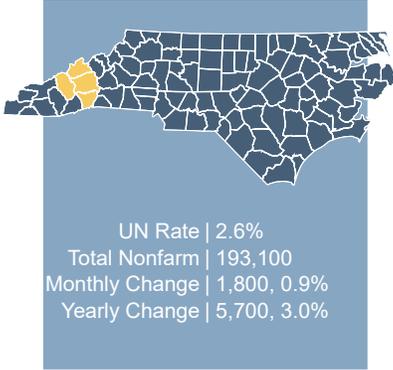

Metropolitan Statistical Areas' Unemployment Rates December 2021* (Not Seasonally Adjusted)

*All December 2021 data are preliminary.

*Data unavailable due to sample cell size. Note: All data are Not Seasonally Adjusted. All December 2021 data are preliminary.

Over the month, 10 of North Carolina's 15 MSAs experienced net job increase. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase with 9,100, followed by Fayetteville, 2,100; Greensboro/High Point, 2,000; Asheville, 1,800; and Wilmington, 1,100. Fayetteville had the greatest percentage increase at 1.6%, followed by Asheville at 0.9%; Wilmington, 0.8%; and Charlotte/Concord/Gastonia, NC-SC, 0.7%. It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted series.

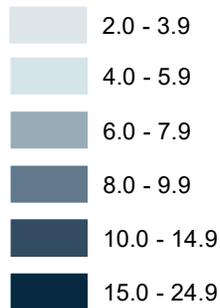

Over the year, employment increased in all of North Carolina's 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase at 39,900, followed by Raleigh, 25,900; Durham/Chapel Hill, 15,300; Greensboro/High Point, 8,900; and Wilmington, 8,800. Wilmington had the greatest percentage increase at 6.9%, followed by Durham/Chapel Hill, 4.8%; Greenville, 4.8%; and Hickory/Lenoir/Morgantown, 4.2%.

North Carolina Rate 3.2%
Not Seasonally Adjusted

North Carolina's labor market saw notable gains in December, with employment and job openings growing robustly and labor force participation ticking up slightly. Our state's unemployment rate declined to 3.7%, approaching its pre-COVID level. However, fewer unemployed workers and more job openings means that our labor market is getting tighter, leading to increased hiring challenges for employers. Expectations for economic growth in the Carolinas have declined in recent months, but remain positive, suggesting continued progress in 2022.
