## North Carolina's May County and Area Employment Figures Released

**RALEIGH** — Unemployment rates (not seasonally adjusted) increased in 65 of North Carolina's counties in May, decreased in 34, and remained unchanged in one. Swain County had the highest unemployment rate at 19.7 percent, while Bertie and Chowan Counties each had the lowest at 8.1 percent. Nine of the state's metro areas experienced rate increases, five decreased, and one remained unchanged. Among the metro areas, Asheville had the highest rate at 16.1 percent and Goldsboro had the lowest at 10.1 percent. The May not seasonally adjusted statewide rate was 12.7 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
<b>May</b>	0	19	81
<b>April (Revised)</b>	0	23	77

When compared to the same month last year, not seasonally adjusted unemployment rates increased in all 100 counties. All 15 of the state's metro areas experienced rate increases.

The number of workers employed statewide (not seasonally adjusted) increased in May by 126,694 to 4,224,833, while those unemployed increased by 31,903 to 617,073. Since May 2019, the number of workers employed statewide decreased 660,445, while those unemployed increased 420,633.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Friday, July 17, 2020 when the state unemployment rate for June 2020 will be released.

**These data can be accessed on the Commerce website at <https://d4.nccommerce.com/>**

## **Accessing Data**

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

## **Technical Notes**

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

### **Labor force and unemployment--from the LAUS program**

**Definitions.** The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

**Method of estimation.** Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2015, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at <https://www.bls.gov/opub/hom/lau/calculation.htm>.

**Revisions.** Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

**Area definitions.** The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at [www.bls.gov/lau/lausmsa.htm](http://www.bls.gov/lau/lausmsa.htm).

### Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at [www.bls.gov/lau/lastderr.htm](http://www.bls.gov/lau/lastderr.htm).

### Release Dates

The next unemployment update is scheduled for Friday, July 17, 2020 when the state unemployment rate for June 2020 will be released.

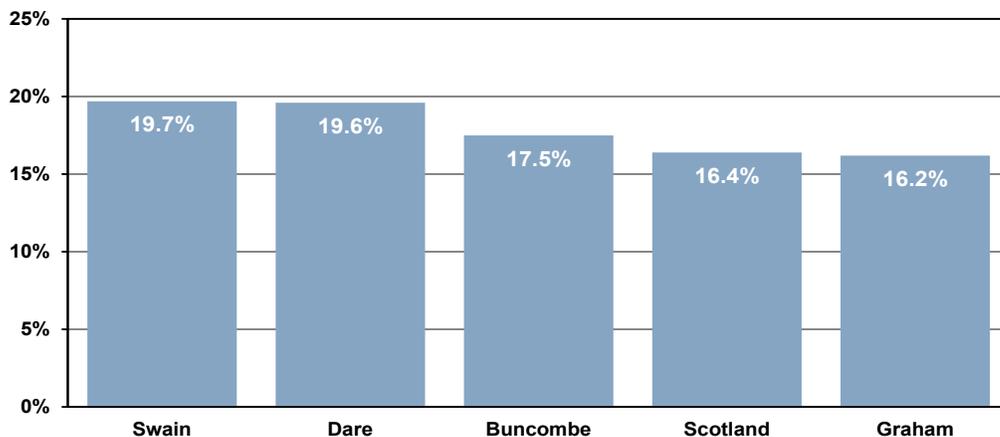

The complete 2020 data release schedule can be accessed at:

<https://www.nccommerce.com/documents/release-dates-unemployment-rates>

## Counties With Highest Unemployment Rates

May 2020\*

(Not Seasonally Adjusted)

North Carolina's statewide unemployment rate (not seasonally adjusted) was 12.7 percent in May. This increased 0.2 of a percentage point from April's revised rate, and grew 8.8 percentage points over the year.

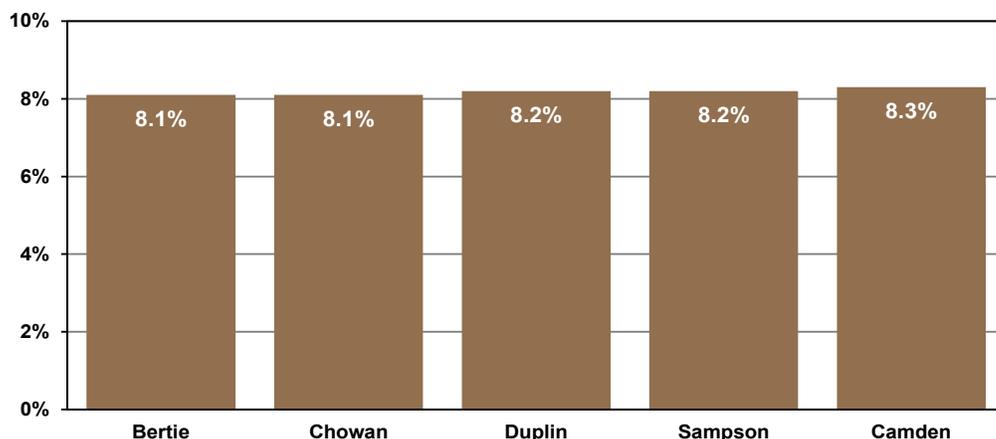

Over the month, the unemployment rate increased in 65 of North Carolina's 100 counties. Fifty-nine counties had unemployment rates at or below the state's 12.7 percent rate.

Swain County recorded May's highest unemployment rate at 19.7 percent, followed by Dare at 19.6 percent. Bertie & Chowan had the lowest unemployment rate at 8.1 percent.

## Counties With Lowest Unemployment Rates

May 2020\*

(Not Seasonally Adjusted)

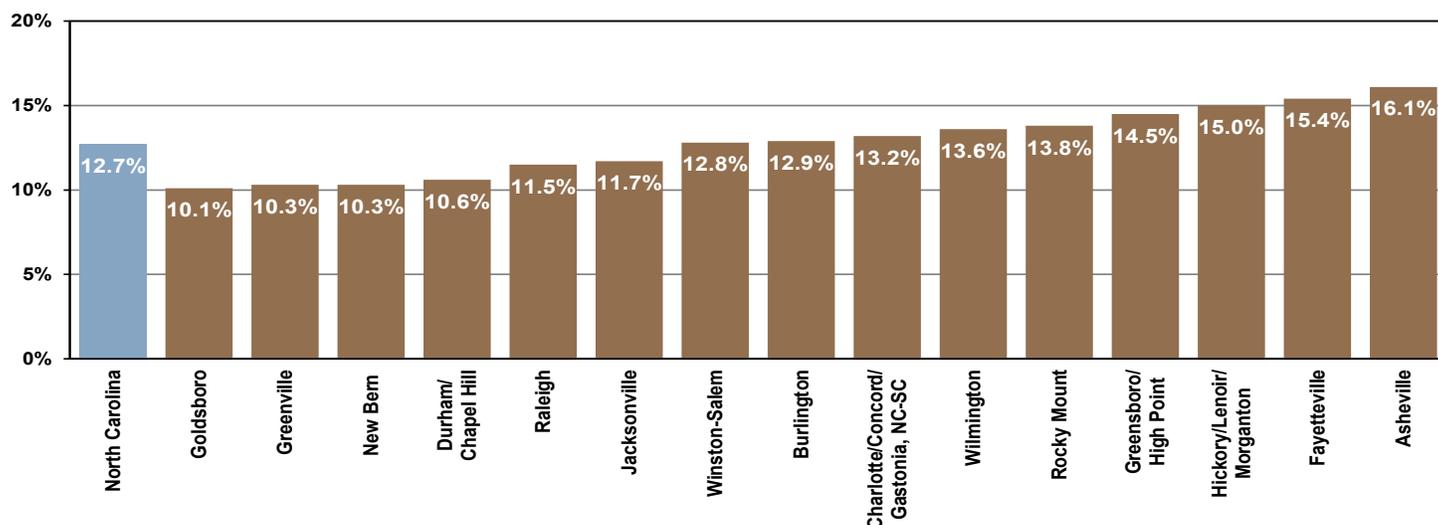

Unemployment rates increased in nine of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Asheville MSA had the highest unemployment rate in May at 16.1 percent, followed by Fayetteville at 15.4 percent, and Hickory/Lenoir/Morganton at 15.0 percent. Goldsboro reported the month's lowest unemployment rate at 10.1 percent, followed by Greenville and New Bern at 10.3 percent.

## Metropolitan Statistical Areas' Unemployment Rates

May 2020\*

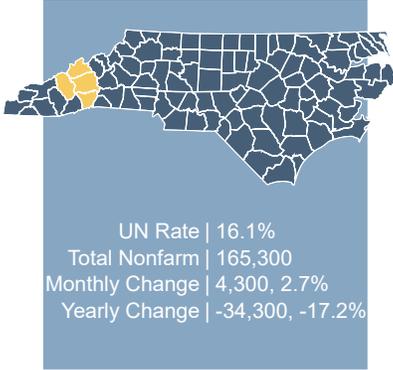

(Not Seasonally Adjusted)

\*Data unavailable due to sample cell size. Note: All data are Not Seasonally Adjusted. All May 2020 data are preliminary.

Over the month, 14 of North Carolina's 15 MSAs experienced net job growth. Charlotte/Concord/Gastonia, NC-SC had the largest net employment increase with 25,900, followed by Greensboro/High Point, 8,400; Raleigh, 7,200; Hickory/Lenoir/Morgantown, 4,600; Asheville, 4,300; Greenville, 4,300; Winston-Salem, 3,300; and Wilmington, 3,200. Greenville had the greatest percentage increase at 6.1 percent, followed by Burlington, 4.8%, Hickory/Lenoir/Morgantown, 3.6%, and Rocky Mount, 3.4%. It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted series.

Over the year, employment decreased in all 15 MSAs. Charlotte/Concord/Gastonia, NC-SC had the largest net employment decrease at 132,600, followed by Raleigh, 81,100; Greensboro/High Point, 54,800; and Durham/Chapel Hill, 38,700. Asheville had the greatest percentage decrease at 17.2 percent, followed by Wilmington, 16.2 percent; Hickory/Lenoir/Morgantown, 16.1 percent; and Greensboro/High Point, 14.9 percent.

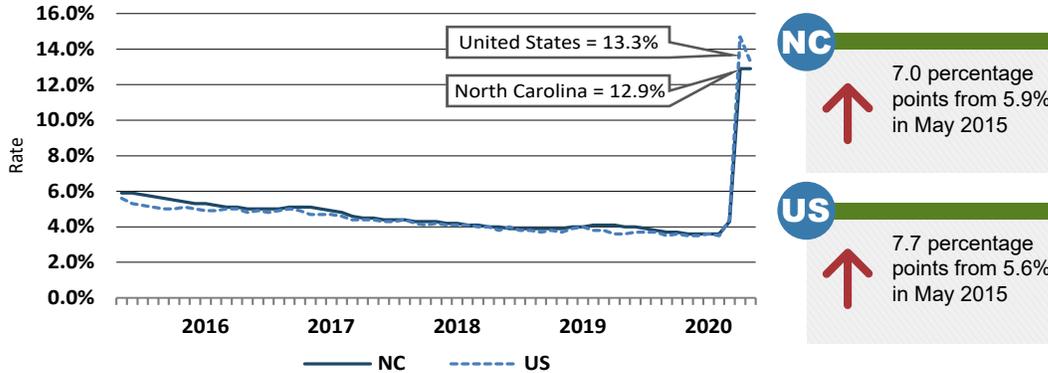

# North Carolina Unemployment Rates by County

## May 2020

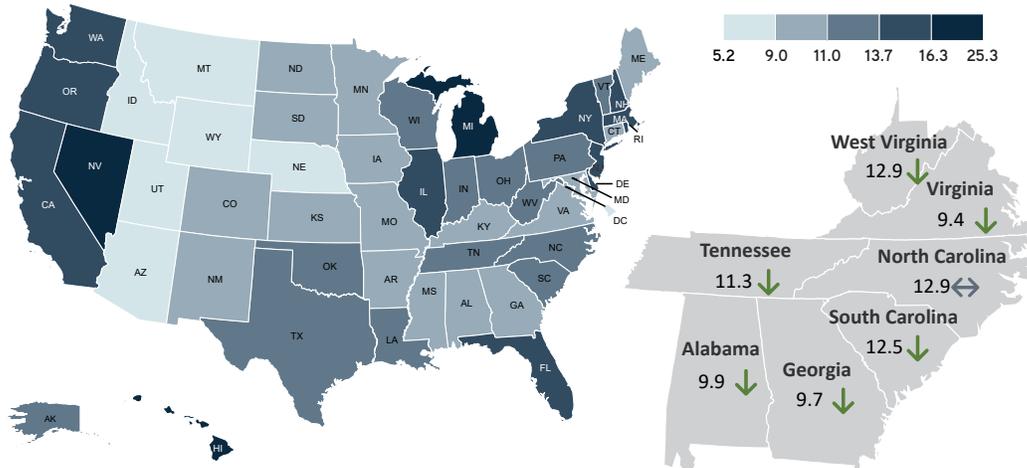

North Carolina's unemployment rate was 12.9% in May, remaining unchanged from April's revised figure. Our state added 67,100 jobs and saw a rapid increase in labor force participation over the month, but despite these notable gains, the labor market has a long way to go before making up the ground lost in March and April. Business contacts surveyed by the Richmond Fed expect conditions in the Carolinas to continue improving over the next six months.
