North Carolina's October County and Area Employment Figures Released

RALEIGH —Unemployment rates (not seasonally adjusted) increased in 86 of North Carolina's counties in October and remained the same in 14. Hyde County had the highest unemployment rate at 8.8 percent, while Buncombe County had the lowest at 2.7 percent. Fourteen of the state's metro areas experienced rate increases and one remained the same. Among the metro areas, Rocky Mount at 4.9 percent had the highest rate and Asheville had the lowest rate at 2.8 percent. The October not seasonally adjusted statewide rate was 3.6 percent.

	Counties With Rates 5% or Below	Counties With Rates Between 5% and 10%	Counties With Rates 10% or Above
October	89	11	0
September (Revised)	92	8	0

When compared to the same month last year, not seasonally adjusted unemployment rates increased in 54 counties, decreased in 24, and remained the same in 22. Four of the state's metro areas experienced rate increases over the year, seven decreased, and four remained the same.

The number of workers employed statewide (not seasonally adjusted) increased in October by 24,205 to 4,967,970, while those unemployed increased by 6,774 to 185,142. Since October 2018, the number of workers employed statewide increased 141,652, while those unemployed increased 4,053.

It is important to note that employment estimates are subject to large seasonal patterns; therefore, it is advisable to focus on over-the-year changes in the not seasonally adjusted estimates.

The next unemployment update is scheduled for Friday, December 20, 2019 when the state unemployment rate for November 2019 will be released.

These data can be accessed on the Commerce website at <https://d4.nccommerce.com/>

Not Seasonally Adjusted

Estimates subject to monthly and annual revisions.

North Carolina Department of Commerce
Labor & Economic Analysis Division
Local Area Unemployment Statistics
(919) 707-1500

Accessing Data

The data presented in this press release, as well as historical data, can be accessed from NC Commerce's Demand Driven Data Delivery ("D4") system:

<https://d4.nccommerce.com/LausSelection.aspx>

Technical Notes

This release presents labor force and unemployment estimates from the Local Area Unemployment Statistics (LAUS) program. The LAUS program is a federal-state cooperative endeavor.

Labor force and unemployment--from the LAUS program

Definitions. The labor force and unemployment estimates are based on the same concepts and definitions as those used for the official national estimates obtained from the Current Population Survey (CPS), a sample survey of households that is conducted for the Bureau of Labor Statistics (BLS) by the U.S. Census Bureau. The LAUS program measures employment and unemployment on a place-of-residence basis. The universe for each is the civilian noninstitutional population 16 years of age and over. Employed persons are those who did any work at all for pay or profit in the reference week (the week including the 12th of the month) or worked 15 hours or more without pay in a family business or farm, plus those not working who had a job from which they were temporarily absent, whether or not paid, for such reasons as bad weather, labor-management dispute, illness, or vacation. Unemployed persons are those who were not employed during the reference week (based on the definition above), had actively looked for a job sometime in the 4-week period ending with the reference week, and were currently available for work; persons on lay-off expecting recall need not be looking for work to be counted as unemployed. The labor force is the sum of employed and unemployed persons. The unemployment rate is the number of unemployed as a percent of the labor force.

Method of estimation. Statewide estimates are produced using an estimation algorithm administered by the BLS. This method, which underwent substantial enhancement at the beginning of 2015, utilizes data from several sources, including the CPS, Current Employment Statistics (CES), and state unemployment insurance (UI) programs. Substate estimates are produced using the "LAUS Handbook Method", which is also based on data from several sources. Each month, census division estimates are controlled to national totals, and state estimates are then controlled to their respective division totals. Substate estimates are controlled to their respective state totals. For more information about LAUS estimation procedures, see the BLS website at www.bls.gov/lau/laumthd.htm

Revisions. Labor force and unemployment data for the previous month reflect adjustments made in each subsequent month, while data for prior years reflect adjustments made at the end of each year. The monthly revisions incorporate updated model inputs, while the annually revised estimates reflect updated population data from the U.S. Census Bureau, any revisions in the other data sources, and model reestimation.

Area definitions. The substate area data published in this release reflect the delineations that were issued by the U.S. Office of Management and Budget on April 10, 2018. A detailed list of the geographic definitions is available online at www.bls.gov/lau/lausmsa.htm.

Reliability of the estimates

The estimates presented in this release are based on sample surveys, administrative data, and modeling and, thus, are subject to sampling and other types of errors. Sampling error is a measure of sampling variability--that is, variation that occurs by chance because a sample rather than the entire population is surveyed. Survey data also are subject to nonsampling errors, such as those which can be introduced into the data collection and processing operations. Estimates not directly derived from sample surveys are subject to additional errors resulting from the specific estimation processes used.

Model-based error measures for seasonally adjusted and not seasonally adjusted data and for over-the-month and over-the-year changes to LAUS statewide estimates are available online at www.bls.gov/lau/lastderr.htm.

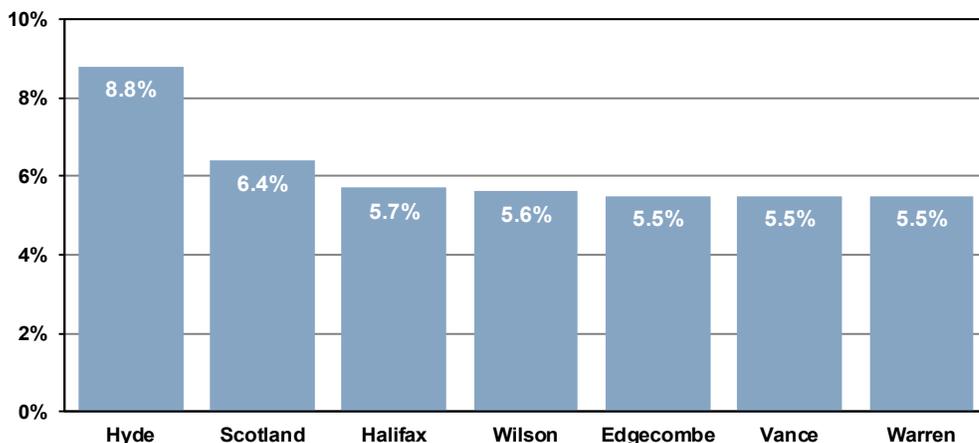

Release Dates

The next unemployment update is scheduled for Friday, December 20, 2019 when the state unemployment rate for November 2019 will be released.

The complete 2019 data release schedule can be accessed at:

<https://www.nccommerce.com/documents/release-dates-unemployment-rates>

Counties With Highest Unemployment Rates October 2019* (Not Seasonally Adjusted)

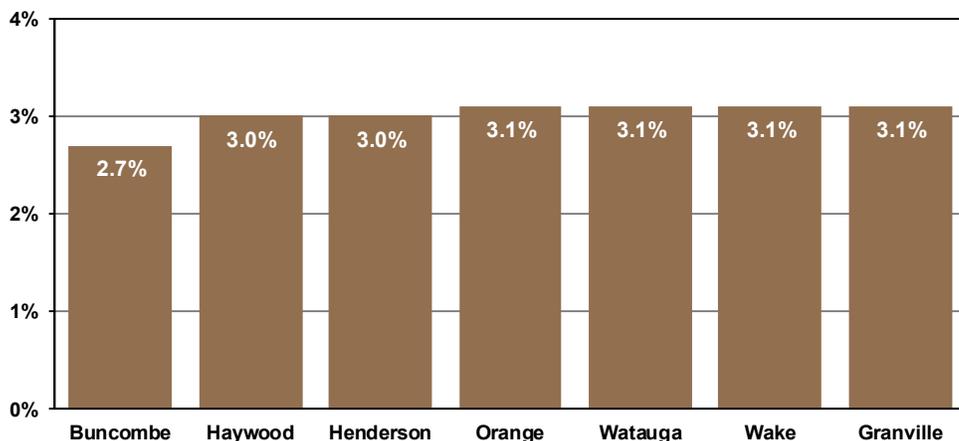

North Carolina's statewide unemployment rate (not seasonally adjusted) was 3.6 percent in October. This increased 0.1 of a percentage point from September's revised rate, and remained unchanged over the year.

Over the month, the unemployment rate decreased in 86 of North Carolina's 100 counties. Forty-seven counties had unemployment rates at or below the state's 3.6 percent rate.

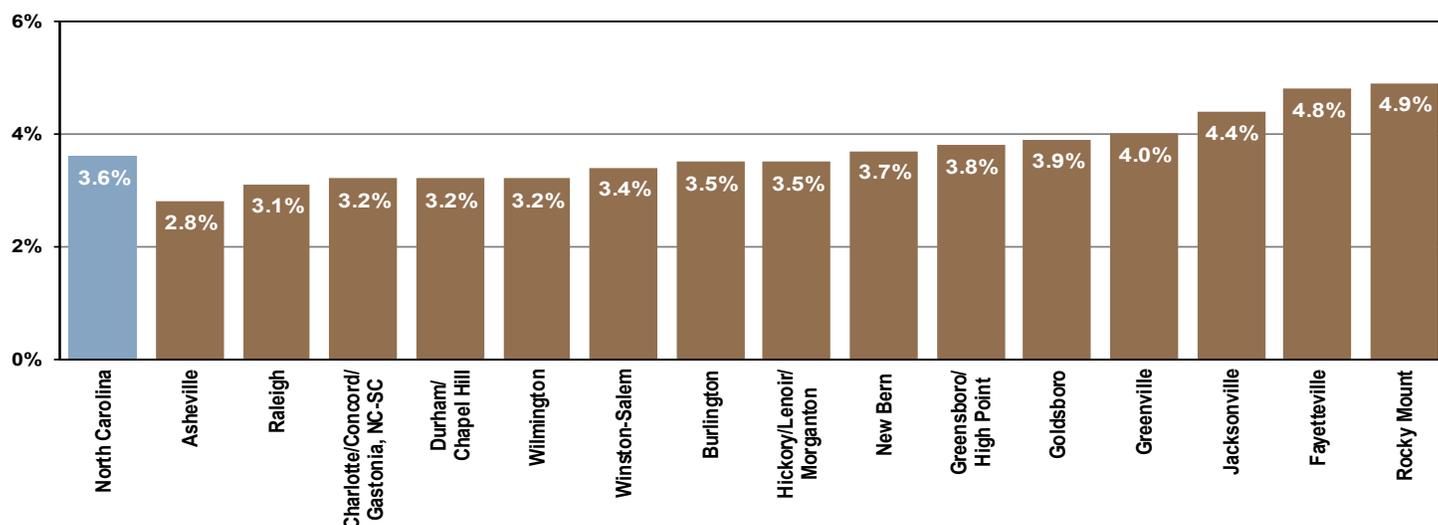

Hyde County recorded October's highest unemployment rate at 8.8 percent, followed by Scotland at 6.4 percent. Buncombe County had the lowest unemployment rate at 2.7 percent, followed by Haywood & Henderson at 3.0 percent.

Counties With Lowest Unemployment Rates October 2019* (Not Seasonally Adjusted)

Unemployment rates increased in 14 of the state's 15 Metropolitan Statistical Areas (MSAs) over the month. The Rocky Mount MSA had the highest unemployment rate in October at 4.9 percent, followed by Fayetteville at 4.8 percent, Jacksonville at 4.4 percent, and Greenville at 4.0 percent. Asheville reported the month's lowest unemployment rate at 2.8 percent.

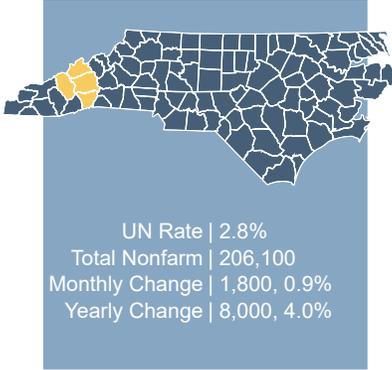

Metropolitan Statistical Areas' Unemployment Rates October 2019* (Not Seasonally Adjusted)

*All October 2019 data are preliminary.
